

## **ENTRUST Object categories**

Depending on the type of project you wish to undertake, you are required to complete a relevant Object Category Form:

### **Object A – Remediation of Land**

The work must be on a single site where there was once something that took place that now stops it being used. The site may have been contaminated in some way. The principle is that the person who polluted the land must now not own or operate from the land. Any orders that the current landowner is under from the relevant environmental agency must not be fulfilled by using Landfill Communities Fund monies.

### **Object B – Reduction of Pollution**

You must be able to demonstrate that the pollution identified in the works you propose is directly linked to help mitigate, prevent or reduce pollution.

### **Object D – Public Amenities**

The primary intent of this objective must be for the general public's benefit for leisure or recreation. The site where the work takes place must be open and accessible to the general public. The intention must not be to generate profit and the site where the work will take place must be within 10 miles of a landfill site.

### **Object DA – Conservation or Promotion of Biodiversity**

The primary intent of this objective must be for the conservation of identified species or habitats. The costs of the work you undertake must be directly related to the identified species or habitat and the place where it naturally occurs.

### **Object E – Maintenance, Repair or Restoration of Religious or Historical Building**

The primary intent of this objective is to maintain, repair or restore a Place of Worship; or a building or structure that must have listed status or equivalent where the general public can access the building. This objective does not allow works to private residences.
